

# Ancillary Products

TFS offer a comprehensive range of ancillary products to complement the extensive selection of fabricated products. The range has been carefully chosen to provide a complete “system package” solution, particularly for floor films and coatings. It also extends to those essential extras required on every project, delivering a one-stop-shop solution for convenience.

TFS specialist products, such as peel clean floor system and floor coatings, have independent certification. These require the use of specific adhesives or tapes to satisfy performance within the scope of the testing. To assist customers to achieve the best results, TFS offer the correct specification of these ancillary products.

Customers obtain the expected performance and complete peace of mind, without the hassle of sourcing these accessories elsewhere. Products include D3 and D4 joint adhesive plus, for peel clean floor system applications and self adhesive joint tape, offering an enhanced level of reliability. For convenience, TFS offer these accessories as specialist kits or, if preferred, as individual items.

The range also includes adhesive applicator guns, fixings, craft knives, gloves, face masks, safety glasses and hard hats. In fact, everything installers need to complete a project quickly and in full compliance with health and safety requirements.
