

# Commercial Floor Coatings

Designed for both safety and aesthetic appearance, TFS commercial floor coatings provide a high performance solution for multiple applications. They are hard wearing, slip resistant and can also be supplied as a decorative finish, all delivering superior performance.

TFS works with the UK's major suppliers of mezzanine decking.

Coatings are applied to 38mm particleboard, with independent certification for wear and slip resistance. This may also be combined with TFS factory applied Class 0 foil to the reverse face for fire retardancy, resistant and weatherproof. An innovative temporary floor protection overlay system is also available. TFS's PU coating can be factory applied to plywood, to protect the floor in public areas during maintenance work.

## Key Product Features

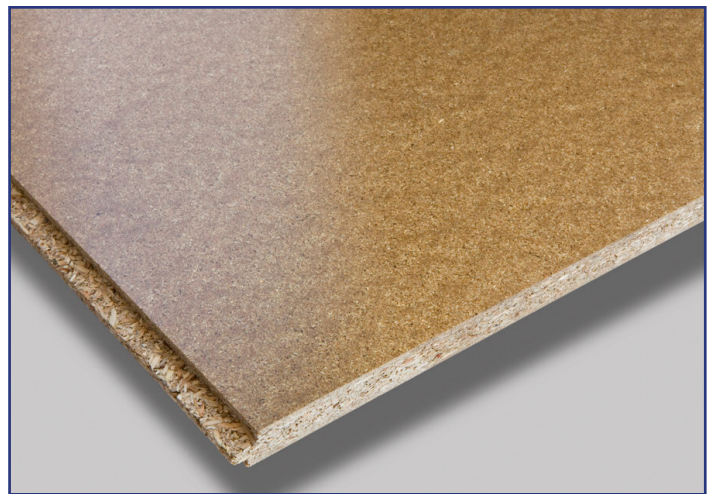

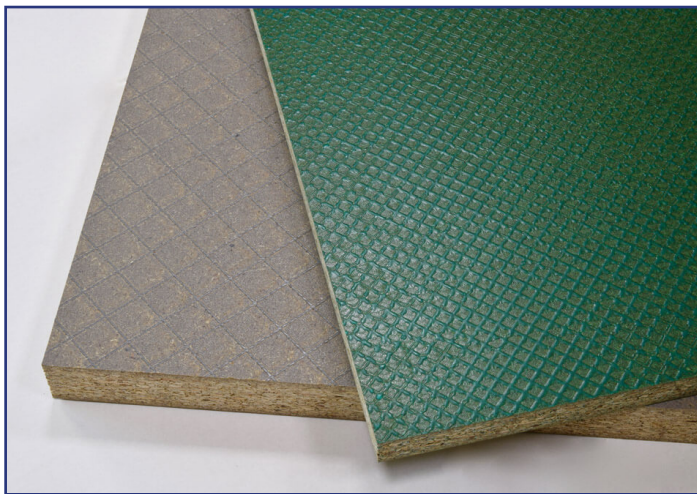

- ✓ Factory applied decorative performance coatings ready for immediate installation
- ✓ Available as a smooth or 'textured' surface treatment
- ✓ Ideal for use with 'secret fix' systems
- ✓ Available on 38mm mezzanine particleboard, plywood and OSB
- ✓ Highly durable supported by independent certification for slip and wear resistance
- ✓ Slip resistant coating for pallet tops
- ✓ Clear or grey colour standard finishes (others on request)
- ✓ Available with a peel off protective film on smooth lacquered finishes
