

Cut to Size Service

Building dimensions vary, so TFS offer a cut to size service to ensure your project runs smoothly. Variations within the built environment generally mean that on-site cuts and finishing are required. This increases the risk of damaging finished surfaces, particularly decorative faces and cuts can be inaccurate or left rough. It is also time consuming and increases costs. Using the TFS cut to size service ensures clean, accurate fabrication as well as saving time and money.

The TFS cut to size facility is ideal when utilised alongside other project specific requirements, such as floor coatings, peel off protective film or a decorative surface finish.

Having the panels cut to size is the perfect way to complete a cost effective solution. On site labour costs are minimised and cutting errors are eliminated. Installation time is significantly reduced and costly replacement or re-works are avoided. This 'One-Stop-Shop' facility enables our clients to obtain factory quality finishes in the size required.

The cut to size service is suitable for a wide range of applications, particularly the fabrication of mezzanine flooring. The correct number of full and pre-cut floor panels can be delivered to site, ready for rapid installation, meaning projects are completed in less time.

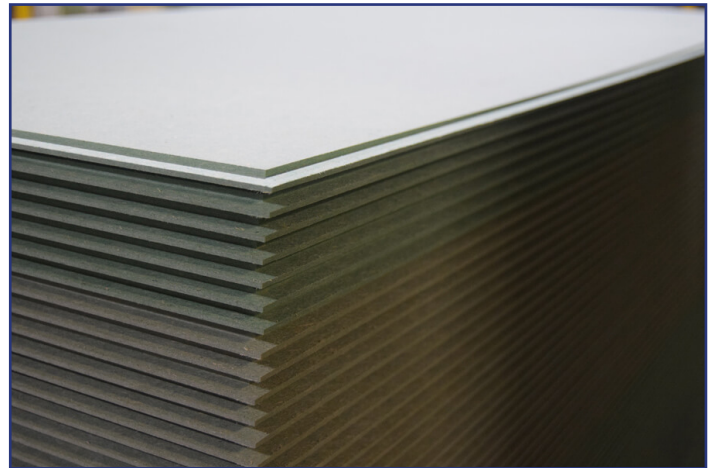

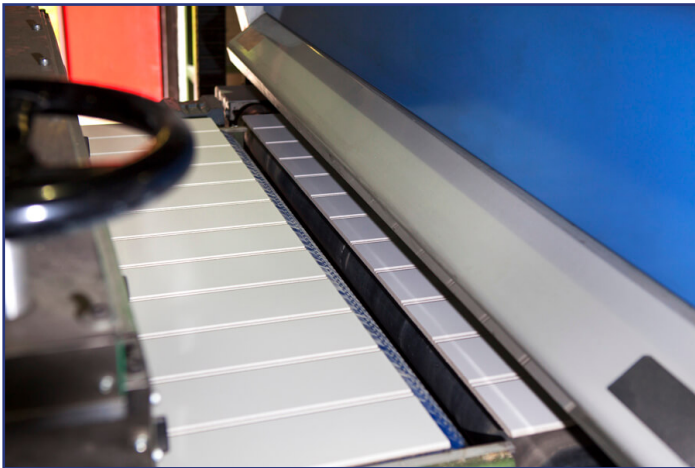

Key Product Features

- ✓ Saves time and money on site
- ✓ Precision factory cuts for a pristine finish
- ✓ Reduces risk of damage
- ✓ Ideal when utilised with other project specific requirements
- ✓ Cost effective "one-stop-shop"

Cut to Size Service

Typical Applications

- ✓ Mezzanine Systems
- ✓ Retail Flooring
- ✓ Decorative Flooring
- ✓ Wall Panelling
