

Peel Off Protective Film

Peel off protective film from TFS is the perfect solution for any project where you need to carefully protect decorative surfaces up to the point of handover on site. It withstands the inevitable knocks and scratches during transport, storage and installation, saving you time and money.

The film is applied to pre-coated smooth surfaces in the TFS factory. Whether the decorative surface has a high gloss decorative coating or attractive UV lacquer, the self adhesive film instantly provides a protective barrier against scratches. On completion, the film is simply peeled away, without leaving any unsightly adhesive residue behind.

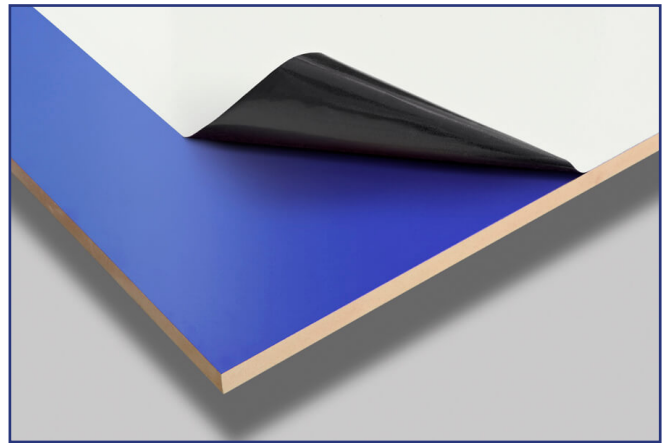

Key Product Features

- ✓ Tough scratch resistant surface suitable for temporary protection
- ✓ Provides a high level of water resistance even when used in horizontal plane
- ✓ Film is easily removed on completion of installation
- ✓ No adhesive residue left on surface of coating
- ✓ Environmentally friendly, recyclable film
- ✓ Suitable for many substrates including MDF, Particleboard, OSB, Plywood, GRP and Metal Sheeting
- ✓ Saves time, effort and money in replacement panels and delayed completions
- ✓ Tape available to protect joints & abutments during fit-out
