

Pre-Finished Doors

An individual and bespoke factory quality finish is now available for internal doorways, with TFS pre-finished doors. Until recently, colour choice was restricted to white – or white! TFS now offer a unlimited choice of colours designed to complement modern living and the latest trends.

Pre-finished doors provide a superior level of quality and consistency, utilising the latest factory application techniques.

The result is a consistent pre-finished, attractive door that is highly durable and will provide many years of service. All without the on site priming, sanding, painting and drying time of several coats, plus dust contamination and even damage.

Pre-finished doors deliver a cost effective alternative to these traditional finishing methods saving valuable labour time and money on site with factory quality consistent every time.

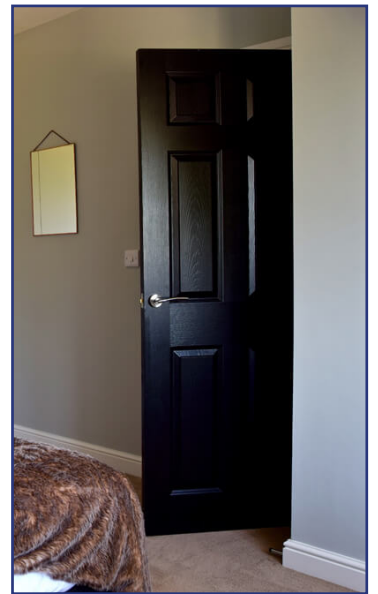

Key Product Features

- ✓ Factory applied consistent coatings ready for immediate use
- ✓ Superior finish for a prestigious appearance
