

Slip Resistant Coatings

TFS has long been associated with slip resistant coatings for a wide range of substrates, particularly for the commercial floor and house building markets, with BBA certification of performance. This technology is also now utilised for new and emerging market sectors.

Temporary floor protection overlay system is an innovative solution for public walkway protection.

It is also ideal for garden or landscaped areas during construction work. It is applied to plywood panels, which are simply lifted after use.

TFS has now developed TradeDek AS, which is specially formulated for timber decking and independently certified to achieve a low slip potential in both wet and dry conditions. It is also ideal for pallet tops and packing case floors.

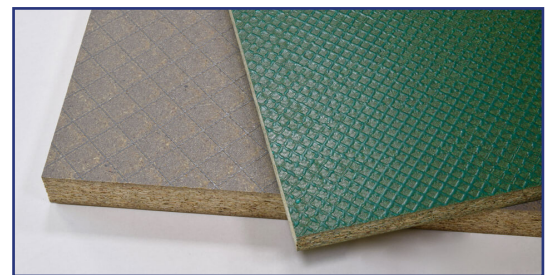

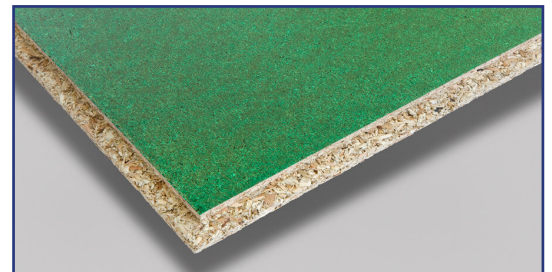

Key Product Features

- ✓ Highly durable, supported by independent certification for slip and wear resistance
- ✓ Factory applied high performance coatings for consistency
- ✓ Available in clear finish or various colours
- ✓ Slip resistant finish ideal for pallet tops
- ✓ Available on particleboard, plywood, MDF, OSB and cement based boards
- ✓ Certified to BS 7976-2:2002 as Low Slip Potential in wet and dry conditions by UKAS Approved testing facility
- ✓ Available as a smooth or 'textured' surface treatment
- ✓ Coatable with suitable maintenance finishes

Slip Resistant Coatings

Typical Applications

- ✓ Mezzanine Systems
- ✓ Retail and Warehouse Flooring
- ✓ New build house floors
- ✓ Temporary Site Protection
- ✓ Softwood / Hardwood Decking
- ✓ Pallet Tops
- ✓ Packing Case Floors
