

Waterproof Film

When the going gets tough, TFS waterproof film provides a high performance solution to the problem of water ingress. It is permanently bonded in the TFS factory for optimum consistency using high performance adhesive for complete peace of mind. The result is a high performance barrier for applications where the necessity for water resistance is paramount.

The film is highly durable, providing long lasting performance in an area of protection where failures can be costly. It can be used in both horizontal and vertical planes. This versatility makes it suitable for a wide range of applications, particularly those requiring regular cleaning with pressure washers. From food production and agricultural use through to contamination wash-down rooms, the benefits are clear to see.

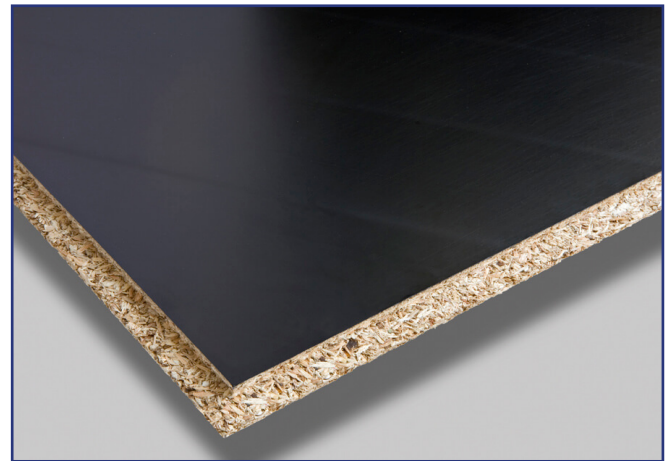

Key Product Features

- ✓ Permanently bonded film ensures lasting performance
- ✓ Ideal for use with pressure washers
- ✓ Suitable for Plywood, MDF, OSB, Particleboard and Cementitious substrates
- ✓ Choose from a range of colours
- ✓ Standard & antibacterial grade
- ✓ Choice of vapour permeable and vapour proof film
- ✓ Part of a system solution – waterproof glue and tape for joints available
- ✓ Environmentally friendly recyclable film
- ✓ Withstands a range of temperatures

Waterproof Film

Typical Applications

- ✓ Wall Panels
- ✓ Ceiling Panels
- ✓ Floor Panels
- ✓ Trailer Floors
