CELEBRATING 25 YEARS
OF LEADING B2B INNOVATION

Your offsite B2B processing partner

Panel processing for all
interior applications

- Speed
- Quality
- Precision

Trade Fabrication Systems has been the UK's leading B2B processing partner for 25 years.

With state-of-the-art manufacturing capabilities we guarantee fast turnarounds and precision quality on our full range of coating, machining and finishing services.

As a completely independent B2B processor, we only process raw materials supplied by our clients. This makes us a unique and impartial partner in this space.

Since 1998 Trade Fabrication Systems Ltd has been the UK's leading processor of BBA approved peel clean protective films for floor panels, Class 0 foil faced boards and factory applied coatings for a variety of applications.

Our initial focus was primarily the construction industry where we identified specific problems and issues related to our unpredictable climate and safety.

The ever increasing demand on efficiency together with tighter building regulations and HSE requirements means house builders in particular are constantly seeking solutions that are simple, cost effective and conform to current legislation. This led to the development of Peel Clean films to provide temporary weather and damage resistance to particleboard flooring, whilst being used as a safe working platform during the build process.

Our enviable reputation has been built over the years by working closely with customers to effectively combine innovation with unbeatable service enabling us to offer products suitable for use in a wide range of industries.

Based in Woolston, Warrington, adjacent to Junction 21 of the M6, employing a highly dedicated workforce and utilising the latest manufacturing processes, TFS offer a diverse range of products and services which are at the forefront of customer expectation and requirements. Factory finished quality products that provide a combination of performance, economy, speed and efficiency.

TFS's experienced and dedicated technical support team thoroughly understand customers' needs, have unrivalled product knowledge and being constantly in tune with the latest industry developments, actively contribute to a continuing company development.

Our services

Films

- Peel clean floor system
- Peel off protective film
- Antibacterial film
- Waterproof film
- Class 0 foils

Performance coatings

- Domestic floor coatings
- Commercial floor coatings
- Slip resistant coatings
- Fire retardant coatings
- Antibacterial coatings
- Roof coatings

Decorative finishes

- Decorative/preservative coatings
- Pre-finished doors
- Pre-finished hoardings

Material bonding

- Breather membrane panels
- Thermal insulated panels
- Acoustic panels

Machining and profiling

- Machining services
- Cut to size services
